

AniVideo.Js

Javascript Plugin

AniVideo.js is a simple, light-weighted and easy to use JavaScript library to combine animations (gifs) and a video together to create beautiful websites.

Get Started

All you will need to include: - The JavaScript file `ani-video.js` - The css file `ani-video.css`

Including files:

```
<link rel="stylesheet" type="text/css" href="./dist/ani-video.css" />

<!-- Javascript Files -->
<script type="text/javascript" src="./dist/ani-video.js"></script>
```

Usage

HTML Structure

Start your HTML document with the compulsory [HTML DOCTYPE declaration](#), must start with a `<!DOCTYPE>` declaration. Than add a html tag and set it's 'id'.

```
<div id="ani-video-wrapper"></div>
```

Initialization

To activate the plugin all you have to set some options based on your requirements

```
//// create new Plugin instance
var aniVideoInstance = new AniVideo({
  // Settings
  selector: "#ani-video-wrapper",
  src: './images/ced.fund_video.mp4',
  startingGif: './images/animation_2.gif',
  endingGif: './images/animation_3.gif',

  // Video
  loop: false,
  muted: true,

  // Appearance
  title: 'We Are Developing A Blockchain Network To Finance Your Student Loan Debt',
  buttonText: 'Click play to learn',
  showOverlayAtEnd: true,
  showProgress: true,

  })
```
